

Joint Focal Persons Coordination Meeting for WIOSAP and SAPPHIRE Projects

Sinikinesh Beyene,
Nairobi Convention Secretariat,
UN Environment

Maputo, Mozambique
14 December, 2018

The Western Indian Ocean Large Marine Ecosystems Strategic Action Programme Policy Harmonization and Institutional Reforms (WIO LME SAPPHIRE) Project

Outline

- Overview
- Progress
- Project organization and set up
- Fast track activities
- Area of coordination with WIOSAP
- Project Coordination Bodies(Structure)

Overview

- The **overall Objectives:** to achieve effective long-term **ecosystem management in the** Western Indian Ocean LMEs in line with the Strategic Action Programme as endorsed by the participating countries.
- Component 1: Supporting Policy Harmonization and Management Reforms towards improved ocean governance
- Component 2: Stress reduction through Community Engagement and Empowerment in Sustainable Resources Management
- Component 3: Stress reduction through Private Sector/Industry Commitment to transformations in their operations and management practices
- Component 4: Delivering best practices and lessons through innovative ocean governance demonstration(particularly strengthening partnerships for management ABNJ)
 - Joint Management Area(JMA) Demonstration project Mauritius and Seychelles (\$2.2m)
- Component 5: Capacity development to realize improved ocean governance in the WIO region

Support the integration of ecosystem based management(EBM) approach in to local economic development(LED) plans, national and regional policies, strategies and programmes including the Blue Economy in WIO LMEs

Progress

- Project inception workshop 16-17 Nov 2017
- Project Steering Committee(PSC) countries assigned focal persons(including an alternate) who will serve as PSC member
- PCU Seychelles set up on progress
- Finance Officer(Nairobi) shared with WIOSAP project
- Communication and Policy Officers(shared position with WIOSAP project)- recruitment process ongoing
- Project Admin Assistant (Seychelles) recruitment process ongoing (UNDP)
- Nairobi Convention Secretariat team supporting both WIOSAP and SAPPHIRE implementation

Project Organization and Set up

- Establishment of Project Steering committee(PSC)
- Frist PSC meeting: agree on TOR and review and endorse 2019 AWP (March 2019)
- Discussion with participating countries and preparation of 2019 AWP
- Presentation, discussion and endorsement of 2019 AWP by the PSC
- In collaboration with WIOSAP, (SWIOFC & SWIOFish) establish relevant technical working group or adopt the existing once
- Identification of key partners and organize discussion on possible partnership for the implementation of different components of the project (WIOMSA, WWF, Birdslife International, WIOSEA, IOTC, WOC, IUCN, academic and research institutions and etc.)
- Regional Policy Steering Committee and STAP meeting

SAPPHIRE Project National Focal Persons (serve as Project Steering Committee

Country	Full Name	Position and Institution	Contacts

Fast Track Activities

- 1. Regional Ecosystem Monitoring guideline developed, adopted and implemented in selected 4 communities/countries
 - Support harmonization of national monitoring activities with regional monitoring programme
- 2. Develop regional methodology/strategy for Marine Spatial Planning(MSP)
 - Stock taking developing launching capacity building pilot implementation in selected countries
- 3. Support countries to adopt regional and global standards for marine water quality parameters and contaminants/pollutants (technical and material/financial support: in collaboration with WIOSAP)
- 4. Support pilot studies/valuation of ecosystem goods and services and deliver cost-benefit analyses at both national and regional level(including relevant financial mechanisms such as PES)
- 5. Pilot demonstration projects on ecosystem based management(EBM) approach into the Local Economic Development (LED) plans and blue economy
 - AWP 2019 incorporates more activities including capacity building and trainings

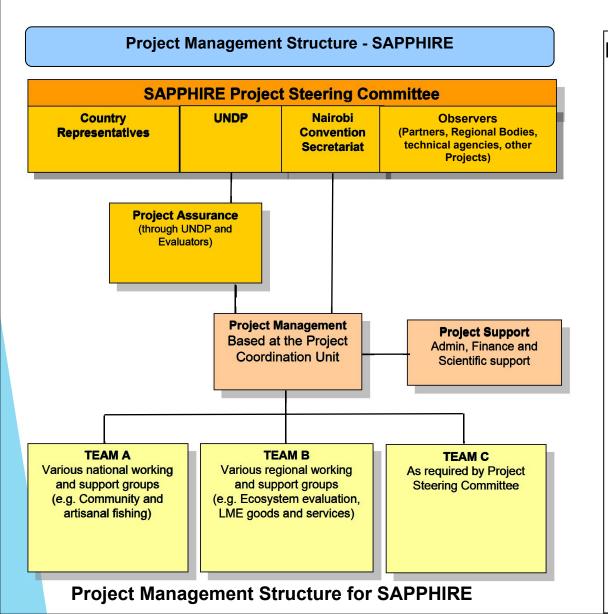

Cross Cutting Thematic Areas for WIOSAP and SAPPHIRE

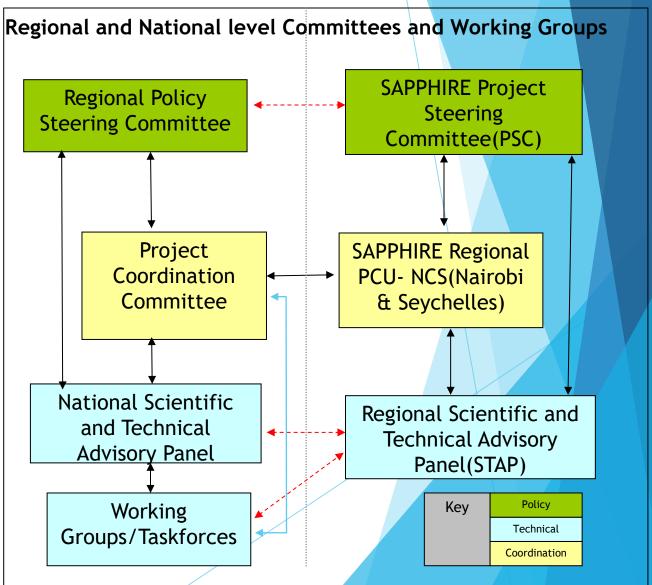

- WIOSAP and SAPPHIRE projects will jointly plan and implement cross cutting activities across the two projects
 - (to ensure cost effectiveness, enhance wider impact and national level harmonization of different initiatives)
- Marine spatial planning(MSP)
- Adoption of regional/global standards for marine water quality parameters and contaminants/pollutants
- 1 Implementation of pilot community-based management approaches to stress reduction
- Institutional capacity building
- Ecosystem economic valuation (including PES)
- Ecosystem monitoring and surveillance (promote science policy interface)
- Support scientific platforms

Project Coordination Bodies

No	Committee		Role and Responsibilities
1	Project Steering committee	•	The highest decision-making body
		•	Overall supervision and guide project activities
2	Regional SAP Implementation	•	Guide and support national and regional
	Policy Steering Committee		bodies/institutions for realignments and changes in
			legislation, policy and associated institutional and
			administrative arrangements in line with the SAP
			requirements
3	Regional SAP Scientific and	•	The major body for ensuring delivery of the
	Technical Advisory Panel		ecosystem monitoring programme
	(STAP)	•	Capacity building and training programme
		•	Advise on any strong trends in the scientific data
			that need fast action at the management level
4	National Intersectoral	•	Coordinate different in country initiative that
	Committees		contribute to SAP implementation
5	National Technical	•	Handle SAP technical and scientific issues and
	Committees/Working Groups		activities in-country

Proposed National and Regional Level Institutional Arrangements for SAPPHIRE Implementation

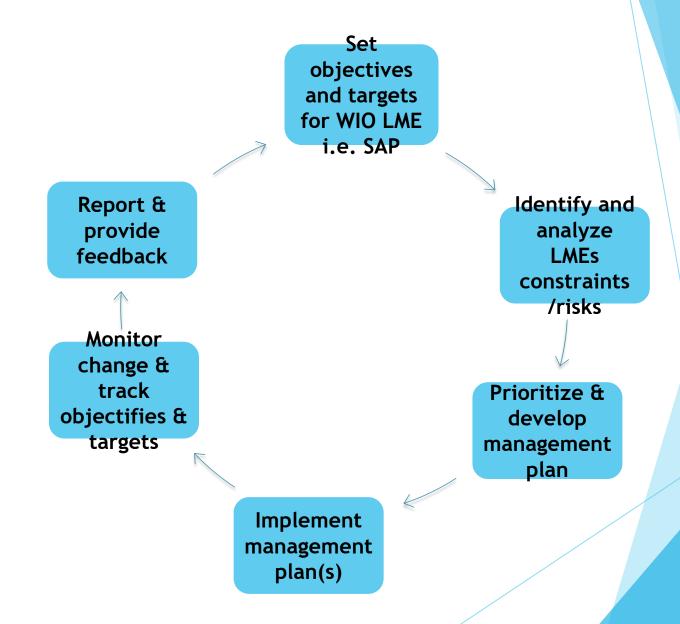

Introduction

- SAPPHIRE identified 14 demo projects to be implemented in selected countries through review and approval process by the PSC/Policy Steering Committee/STAP
- The overall objective is to scale up best practices and initiatives that contribute to SAP implementation in the participating counties
- Call for proposal will be send out to countries and relevant institution, technical committee will be established and review the proposals against the set criteria
- Throughout the demo projects implementation period;
 - Best Practice and lesson learned documentation for wider learning, scale up and replication
 - Policy brief will be prepared and shared(inform polices)
 - Adaptive management designed and implemented

Adaptive Management

AM: is a process for managing uncertainty, incomplete information/knowledge and changing and dynamic natural systems to improve management responses

Adaptive management cycle for sustainable LMEs(open source: modified for this presentation)

Demonstration Projects

Component 1: Supporting Policy Harmonization and Management Reforms towards improve ocean governance

1.1. Regional Ecosystem Monitoring guideline adopted and implemented in selected sites-countries(approved by STAP)

(support harmonization of national monitoring activities with regional monitoring programme)

- 1.2. Support countries to adopt regional and global standards (e.g. as provided for by IMO Conventions and protocols) for marine water quality parameters and contaminants/pollutants
- 1.3. Support pilot studies of ecosystem goods and services and deliver cost-benefit analyses at both national and regional level(including relevant financial mechanisms such as PES)
- 1.4. Support **7 countries**(WIO LME) to implement community-led participatory MSP as best practice demonstration initiatives(joint planning with WIOSAP) project

Component 2: Stress Reduction through Community Engagement and Empowerment in Sustainable Resources Management

Demo Projects Cont.

Component 2: Stress Reduction through Community Engagement and Empowerment in Sustainable Resources Management

- 2.1. Promote integration of the ecosystem based management(EBM) approach into the Local Economic Development (LED) plans in selected demonstration communities select LED plans developed during the ASCLME)
- 2.2. Stress reduction through ecosystem-based practices among artisanal and subsistence fisheries(4) communities will be selected: alternative livelihoods, capacity building and conflict resolution mechanism)
- 2.3. Community-led Artisanal Fisheries Management Plans developed and adopted (incorporated in to the national plans)

Component 3: Stress Reduction through Private Sector/Industry
Commitment to transformations in their operations and management
practices

Demo Projects Cont.

Component 3: Stress Reduction through Private Sector/Industry Commitment to transformations in their operations and management practices

- 3.1. Development of the "Smart Ocean/Smart Industries" program as an International Ocean Science and Industry Platform(WOC)
- Develop stronger partnership with the private sector and maritime industries (particularly through the WOC) in order to reduce stress to the LMEs from their activities
- 3.2. Piloting of an ocean-industry initiative within the WIO LMEs (working closely with the WOC): The Private Sector "mainstreaming" LME approach in their everyday management practices and business activities (EQOs and SAP)
- 3.3. Support regional SEA to be conducted for the entire oil and gas development region (strong focus on the northern Mozambique Channel)

Demo Projects Cont.

Component 4. Delivering Best Practices and Lessons through Innovative Ocean Governance

Demonstrations

- 4.1. Innovative management options for Contiguous Adjacent High Seas Areas(CAHSAs) and ABNJ within LMEs: support design and implementation of Ecosystem Monitoring Strategy(EMS)
- 4.2. Demonstrating innovative ocean governance mechanisms and delivering best practices and lessons for Extended Continental Shelf management within WIOLMEs (JMA Demonstration project: Seychelles and Mauritius)
- 4.3. South Africa intersectoral collaboration and management mechanisms demonstration initiative
- 4.4. Demonstrating Marine Spatial Planning within a Blue Economy framework in selected areas within participating countries (pilot integration of MSP-LED-EBM-Blue Economy planning in selected 4-5 communities) (outcomes 1,2 & 4)
