REGIONAL ROADMAP

3 ACTIONABLE RECOMMENDATIONS FOR MAKING REGIONAL MSP PROGRESS

1. Establish a regional MSP technical working group to:
   a) Develop MSP strategies & guidelines (with milestones)
   b) Conduct regional and national legal / policy gap analysis
   c) Determine key data layers needed (for minimum and optimal MSP) for national and transboundary

2. Data Management:
   a) Strengthen national lead data centers
   b) Agree to contribute transboundary / regional data (or at least metadata) to a common repository

3. Capacity building & communications focused on:
   a) National governments: with packages for governments at different stages
   b) Communities & stakeholders
   c) (Not mentioned in group – but seems like key regional need: GIS and spatial analysis skills for researchers)
