

# **Regional Workshop on Ecosystem Monitoring**

**Status of National Data Centres and Successes and Challenges  
in Data Collection**

**28 January 2025  
Dar es Salaam, Tanzania**

Mozambique

# Current Status and Successes in Data Collection

- ✓ Mozambique is doing monitoring and producing data base and information
  - ✓ Fisheries
  - ✓ Monitoring mangrove – North Mozambique
  - ✓ Seagrass Mapping
- ✓ Relevant biodiversity data base
  - ✓ BioNoMo- platform of primary biodiversity data
    - ✓ BioNoMo1-coordinated by DCB-UEM
    - ✓ BioNoMo2- coordinated by Museum of the Natural History
    - ✓ <https://bionomo.opensci.org/bionomo>
    - ✓ Collaboration among many institutions (MTA, UEM, UniLúrio, Museum of natural History, InOM, WCS, ANAC)

SIBMOZ- Online platform for compilation of biodiversity information - <https://sibmoz.gov.mz/ecosystems/>

- ✓ Financed UNEP-WCMC, through the CONNECT project
- ✓ Coordinate by Ministry of Land & Environment (MTA-DINAB) and Wildlife Conservation Society (WCS)

SIBMOZ received a bronze medal from CHM of the Convection of Biodiversity diversity – October 2024

# Challenges in Data Collection

- ✓ Continuous maintenance of the data bases
- ✓ Retain the human resources
- ✓ National data policy
- ✓ The research is in form of project

**Thank you. Merci.  
Obrigado. Asanteni.**
